GROUP PROFILE

The Metro Group was originally founded in 1995. So, it is well into its third decade of successful operation. During this period the group has displayed a relentless pursuit of excellence. In the face of obvious market challenges the Metro Group has remained steadfast in its commitment to innovation. Today the Metro Group has become a household name when it comes to Aluminium Composite Panels, Aluminium Partition Panels, Plywood, Particle Boards, MDF Boards, HPL and PVC Laminates.

Metro Group manufactures its products across six top notch manufacturing units spread over Himachal Pradesh, Gujarat and Haryana. All the production units are equipped with machines imported from Germany, Japan, China, Italy and Sweden.

Metro Group was awarded the title of Power Brands Rising Star 2018 at a glittering ceremony at Hotel Orchid, Mumbai. Mr. Aman Garg, Director of Metro group was felicitated by Raveena Tandon (Indian Bollywood actress) and H. E. Adam Burakowski (Polish Ambassador to India). The event was conducted in association with Times Now and Bright Outdoor Media.

Metro Group has incessantly engaged in the endeavor of improving its product line and quality of product delivered. Customer satisfaction has always been the group's foremost priority. Today the group has made environmental friendly sustainability a part of its corporate identity by removing harmful materials throughout its supply chain and production cycle.

CARB MDF

CARB stands for California Air Resources Board (USA). CARB PHASE 2 regulation has to do with reducing formaldehyde emissions from hardwood plywood, particleboard, and medium-density fibreboard. This regulation is important because it ensures the air, we breathe is healthy and free from carcinogens that can harm us. CROSSBOND MDF Board is available with CARB Phase 2 compliance & TSCA Title VI certification.

PARTICLE BOARDS

Crossbond Particle Board is an engineered wood product. It consists of several layers of wood particles mixed with resins and binders formed under heat and pressure to create a panel. At the time of manufacturing, additives are incorporated to impart specific performance enhancements including greater dimensional stability, increased fire retardancy and moisture resistance.
